

Overview

Burden classification

The Global Nutrition Report classifies this country as experiencing two forms of malnutrition – anaemia and stunting

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates, NCD Risk Factor Collaboration, WHO Global Health Observatory.  
Notes: Thresholds for a country having the form or not: stunting in children aged under 5 years ≥20%; anaemia in women of reproductive age ≥20%; overweight (body mass index ≥25) in adult women aged ≥18 years ≥35%.

Progress against global nutrition targets 2018

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates, UNICEF global databases: Infant and Young Child Feeding, NCD Risk Factor Collaboration, WHO Global Health Observatory.  
Notes: The methodologies for tracking differ between targets. Data on the adult indicators are based on modelled estimates. See Appendix 1 of the 2018 Global Nutrition Report for details of the methods and sources used to assess progress towards global nutrition targets.

Economics and demography

Poverty rates (%) and GDP (PPP\$)

Source: World Bank 2018.  
Note: GDP = gross domestic product. PPP = purchasing power parity.

Under-5 mortality (per 000 live births)

Source: UN Inter-agency Group for Child Mortality Estimation 2018.

Income inequality

| Gini index score <sup>1</sup> | Gini index rank <sup>2</sup> | Year |
|-------------------------------|------------------------------|------|
| NA                            | NA                           | NA   |

Source: World Bank 2018.  
Notes: 0 = perfect equality, 100 = perfect inequality.<sup>1</sup> Countries are ranked from most equal (1) to most unequal (155).<sup>2</sup>

Population

|                          |       |      |
|--------------------------|-------|------|
| Population (000)         | 5,069 | 2017 |
| Under-5 population (000) | 755   | 2018 |
| Rural (%)                | NA    | 2017 |
| >65 years (000)          | 185   | 2018 |
