

# Bolivia (Plurinational State of)

## Overview

### Burden classification

The Global Nutrition Report classifies this country as experiencing two forms of malnutrition – overweight and anaemia

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates, NCD Risk Factor Collaboration, WHO Global Health Observatory.  
Notes: Thresholds for a country having the form or not: stunting in children aged under 5 years ≥20%; anaemia in women of reproductive age ≥20%; overweight (body mass index ≥25) in adult women aged ≥18 years ≥35%.

### Progress against global nutrition targets 2018

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates, UNICEF global databases: Infant and Young Child Feeding, NCD Risk Factor Collaboration, WHO Global Health Observatory.  
Notes: The methodologies for tracking differ between targets. Data on the adult indicators are based on modelled estimates. See Appendix 1 of the 2018 Global Nutrition Report for details of the methods and sources used to assess progress towards global nutrition targets.

## Economics and demography

### Poverty rates (%) and GDP (PPP\$)

Source: World Bank 2018.  
Note: GDP = gross domestic product. PPP = purchasing power parity.

### Under-5 mortality (per 000 live births)

Source: UN Inter-agency Group for Child Mortality Estimation 2018.

### Income inequality

| Gini index score <sup>1</sup> | Gini index rank <sup>2</sup> | Year |
|-------------------------------|------------------------------|------|
| 45                            | 124                          | 2016 |

Source: World Bank 2018.  
Notes: 0 = perfect equality, 100 = perfect inequality.<sup>1</sup> Countries are ranked from most equal (1) to most unequal (155).<sup>2</sup>

### Population

|                          |        |      |
|--------------------------|--------|------|
| Population (000)         | 11,052 | 2017 |
| Under-5 population (000) | 1,201  | 2018 |
| Rural (%)                | 31     | 2017 |
| ≥65 years (000)          | 767    | 2018 |

## Underlying determinants

### Food supply

Source: FAOSTAT 2018.

### Gender-related determinants

|   |      |      |
|---|------|------|
| Early childbearing: births by age 18 (%) <sup>1</sup> | 20   | 2008 |
| Gender Inequality Index (score*) <sup>2</sup>         | 0.45 | 2017 |
| Gender Inequality Index (country rank) <sup>2</sup>   | 101  | 2017 |

Sources: UNICEF 2018;<sup>1</sup> UNDP 2018.<sup>2</sup>  
Note: \*0 = low inequality, 1 = high inequality.

### Population density of health workers per 1,000 people

|                          |      |      |
|--------------------------|------|------|
| Physicians               | 0.47 | 2011 |
| Nurses and midwives      | 1.01 | 2011 |
| Community health workers | 0.12 | 2001 |

## Children (under 5) nutrition status

Under 5 by gender: wasting (%)

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates.

Under 5 by gender: stunting (%)

Under 5 by gender: overweight (%)

Under 5 by household income: wasting (%)

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates.

Under 5 by household income: stunting (%)

Under 5 by household income: overweight (%)

Under 5 by household location: wasting (%)

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates.

Under 5 by household location: stunting (%)

Under 5 by household location: overweight (%)

Under-5 coexistence of wasting, stunting and overweight

Sources: UNICEF, Division of Data Research and Policy (2018), Global UNICEF Global Databases: Overlapping Stunting, Wasting and Overweight, New York, May 2018.  
Notes: Percentage of children under 5 years of age who experience different and overlapping forms of malnutrition.

# Bolivia (Plurinational State of)

## Child feeding practices

Sources: UNICEF, Division of Data Research and Policy (2018), Global UNICEF Global Databases: Infant and Young Child Feeding, New York, May 2018.

## Children and adolescent (aged 5–19) nutrition status

## Adult nutrition status

Dietary needs

Consumption of food groups and components, 2016

Source: Global Burden of Disease, the Institute for Health Metrics and Evaluation.  
Notes: Men and women aged 25 and older. TMREL = theoretical minimum risk exposure level.

Financial resources and policy, legislation and institutional arrangements

Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).  
Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2016 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

National policies

|  |     |
|--|-----|
| Mandatory legislation for salt iodisation  | Yes |
| Sugar-sweetened beverage tax               | No  |
| Food-based dietary guidelines              | Yes |
| Multisectoral comprehensive nutrition plan | Yes |

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review.

Targets included in national (nutrition or other) plan

|          |         |                  |                  |                         |         |             |                                   |
|----------|---------|------------------|------------------|-------------------------|---------|-------------|-----------------------------------|
| Stunting | Anaemia | Low birth weight | Child overweight | Exclusive breastfeeding | Wasting | Salt intake | Overweight adults and adolescents |
| Yes      | Yes     | Yes              | Yes              | Yes                     | Yes     | Yes         | Yes                               |
