

Overview

Burden classification

The Global Nutrition Report classifies this country as experiencing one form of malnutrition – anaemia only

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates, NCD Risk Factor Collaboration, WHO Global Health Observatory.

Notes: Thresholds for a country having the form or not: stunting in children aged under 5 years \geq 20%; anaemia in women of reproductive age \geq 20%; overweight (body mass index \geq 25) in adult women aged \geq 18 years \geq 35%.

Progress against global nutrition targets 2018

Under-5 stunting

Under-5 wasting

Under-5 overweight

WRA anaemia

No progress or worsening

Exclusive breastfeeding
